# DnA: Project Phase 2

Aryan Gupta, Shashwat Dash, Himani Belsare [ASH] Team 48

Entity Relationship Diagram:

Changes we made:

1. ReturnBy is a derived attribute of the entity type "Order". It is derived from the attribute "orderPlacedDate". Assuming we can return every order within 15 days of ordering it, we can calculate by when we can return it based on the orderPlacedDate.
2. The attribute "name" is the primary key of the entity type couponCode.
